

MISSION:
TO CARE. TO HEAL.
TO EDUCATE.
TO RESTORE
INDEPENDENCE.

36 Years of Continuing Excellence

Adena Greenfield Medical Center Physical Rehabilitation Services

INPATIENT OUTCOMES REPORT 2019

The Inpatient Rehabilitation Unit at Adena Greenfield Medical Center was awarded three-year accreditation by the Commission on Accreditation of Rehabilitation Facilities (CARF) in 2017 and is recognized by CARF as a Stroke Specialty Unit for rehabilitation. AGMC is the only facility in our service area with these specialty accreditations.

The Inpatient Rehab Unit provides patients with a minimum of three hours of therapy a day, six days a week. Our traditional and innovative therapy methods show our commitment to providing patients with the highest standard of care. Some of the things that set AGMC apart include the enabling garden, community re-entry, driving screening, certified hand therapist, lymphedema and a variety of other unique techniques.

HOW DO WE COMPARE?

Our patients leave with a greater level of function.

Our Functional Independence Measure (FIM) change score was 27.4 compared to 21.7 nationally.

Our patients improve more in a shorter period of time. Our average length of stay was 11 days, compared to 22 days nationally. Our length of stay efficiency was 3.46 compared to 1.77 nationally.

OUR REHAB TEAM CONSISTS OF:

- Patient & Family
- Medical Director
- Hospitalist & CNP
- Physical Therapy
- Occupational Therapy
- Speech Therapy
- Recreational Therapy
- Rehabilitation Nursing
- Rehab Psychology
- Social Worker/Case Manager
- Program Manager
- Admissions Coordinator

AGMC is also able to provide a less intensive level of skilled care. If a patient is not able to tolerate three hours of therapy a day, they can choose to come to a skilled bed (within our hospital setting) and receive the same excellent care and services at a lower level of intensity. AGMC provides individualized care based on the patients' needs and tolerance.

Outpatient Physical, Occupational and Speech therapy are available to patients to provide a consistent continuum of care. AGMC also provides Outpatient Neuropsychology services.

More of our patients return to a community setting. 88% of our patients were discharged back to a community setting, compared to 78% nationally. 5% of our patients were discharged to an acute setting compared to 8% nationally. 6% were discharged to long-term facilities compared to 12% nationally. Zero patients expired and zero patients had interruptions during their stays.

INPATIENT OUTCOMES 2019

DIAGNOSTIC MIX

Impairment	Number of Patients	Percent of Total
Orthopedic	72	46%
Debility	39	25%
Stroke	33	21%
Brain Injury	2	1%
Cardiac	7	5%
Amputee	2	1%
TOTAL CASES	155	

TOP DIAGNOSES IN 2019

ORTHOPEDIC

Impairment	Percent of Total
Knee Replacement	29%
Other Orthopedic	44%
Hip Replacement	25%
Hip Fracture	4%

HOW WE COMPARE

Facility	Length of Stay	LOS Efficiency*	Return to Community
AGMC	8 days	4.20	94%
National	18 days	2.25	87%

STROKE (CVA)

Cerebrovascular Accident (CVA)	Number of Patients	Percent of Total
Right CVA	14	42%
Left CVA	16	48%
Other CVA	3	9%

HOW WE COMPARE

Facility	Length of Stay	LOS Efficiency*	Return to Community
AGMC	19 days	1.77	82%
National	44 days	1.25	67%

*(LOS) length of stay efficiency measures the rate of functional improvements, so a higher value is better.

In summary, more AGMC rehab patients were discharged to their homes in a shorter length of time, with greater improvement, than the national average.

PATIENT SATISFACTION

The following information is a summary of the outstanding patient satisfaction survey results for January through December of 2019. We are very proud of these results.

Nurses Treat with courtesy & respect	91.8% top box
Friendliness of Rehab Staff	98.7% top box
Staff worked together to care for you	91.3% top box
Likelihood of recommending	93.8% top box
Staff wash their hands before exams	97.9% top box

- Nurses were friendly and knew their jobs.
- I highly recommend.
- It was the best stay I ever had.
- Wonderful service – excellent people – uplifting – positive.
- All the therapists were amazing! Always right there and attentive. I made great progress in my 2 weeks.
- The entire staff was incredible! I felt like I was a family member and not just a patient. From housekeeping to the doctors, I was respected and well cared for.
